Projects

Challenge Project 2025–26, Essex County Council (Ongoing)

University of Essex – Department of Government

- Working with Essex County Council on a research project supporting its devolution and governance strategy.
- Conducting policy analysis and presenting evidence-based recommendations to council officers.

No-code AI and Data Science Project – Smoking Prediction Using KNIME

- Completed a KNIME-based data science and machine learning project predicting smoking behavior from body signals, earning a badge from KNIME.
- Built an interactive KNIME Data App for univariate and multivariate data visualization.
- Conducted exploratory data analysis and created visualizations.
- Trained and deployed optimized machine learning models for real-world predictions.

Involvement

Economics Society – University of Essex (UK): Events Organizer responsible for planning and executing networking events, guest speaker sessions, and workshops. Led marketing efforts, increasing membership from 50 to 160. Managed event logistics, budgeting, and speaker coordination.

Summer PRAXIS Camp – BRITA Group (Germany): Analyzed market trends and competitors to develop strategies to attract Gen Z consumers in the UK. Conducted SWOT analysis, benchmarked successful brands, and provided data-driven recommendations to BRITA's leadership. Presented findings, earning a grade of 1.0.
